Pocheon Hantangang River Geopark

What is a geopark? It refers to a program that selects geologically important areas or areas of beautiful landscape, protects the heritage and uses it in a sustainable way. Hantangang River Geopark is the first geopark created in the capital area and the one and only Korean geopark that centers on a river. In the terrain of Pocheon, there are 11 geological attractions. Hantangang River is the only Korean river valley made of basalt, and Hantangang River Geopark has outstanding attractions related to volcanic activities.
